

## 2017—*The Wheel of Fortune Year* *Finalizations & New Beginnings*

2016 was a year focused on **Mastery & Completion**—completing unfinished business from the past. The primary challenge of 2016 was letting go of old patterns of self-cruelty and criticalness and walking our talk.

The primary symbol for 2017 is the **WHEEL OF FORTUNE**, which is a symbol of success—finalizations and new beginnings. This is a year of expanding opportunities, awakening to possibilities around you and taking what might formerly have looked like “risks” as you open to personal fulfillment. This is also a year to express generosity, which is the seed of abundance and prosperity.

During 2017, you will be faced with opportunities to be more flexible and non-judgmental and be open to good fortune in every area of your life. One of the hallmarks of the Wheel of Fortune is the ability to recognize opportunity, especially financial opportunity, even if it appears in “disguise”. Judgment limits the scope of vision, letting in only evidence (and therefore, opportunity) which fits a pre-determined criteria or which is consistent with your previous experience. This is a year where you are challenged to fully express original ideas and visions, which will, in turn, open you to greater flexibility, resilience, optimism and awareness.

### **The keys:**

1. Have the central focus or purpose for your life clearly before you to bring all activities into perspective and alignment.
2. Make proactive changes in your life in the direction of your goals and dreams, which will then produce many unexpected activities and positive changes of direction and fortune.

*“All abundance is mine.”*

*“I open to new opportunities and experience expansion, prosperity and abundance as I awaken to my inner wholeness.”*

2017 is also a year focused on **Idealism**—moving out of defensive patterns of relationship with the world where you rely on your limited self to meet all of your needs, and moving into a pattern of defenselessness, knowing your true relationship with the Divine and the strength, guidance and abundance which is yours in that relationship. Idealists need to release obsession for what is probably an unattainable perfection as well as basic dissatisfactions with what they do. Instead of wanting everything different immediately, adopt the idea of growth or evolutionary change and celebrate the perfection of each event in its process of becoming. This allows for greater acceptance of “mistakes” as learning opportunities, opening you to a willingness to try more and different experiences without fear.

*“I see good unfolding everywhere.”*

*“I am in the right place at the right time happily becoming and expressing the perfect Self that I am.”*

### **The primary support tools available in 2017 are:**

- **The Chariot**—When you begin to fear failure and experience holding back, you must grab the reins, take some risks, and go for it, following what has heart and meaning for you.

*“I consciously choose for change.”*

*“I know my chosen path and consciously focus my energies toward my goal.”*

- **The Manifestor**—Develop efficiency in practical matters. Strengthen your sense of values and self-worth. This is a symbol of purposeful determination and power leading to practical, tangible results.

*“I have what I choose.”*

*“My strong sense of purpose and personal values powerfully create the manifestation of my desires.”*

- **The Soul**—Representing creativity and true humility.

*“I am perfectly led by my heart.”*

*I totally trust and follow the guidance of my heart in all that I think, say and do.”*

**Dr. Robert Waldon** offers personal, one hour recorded symbolic readings for individuals or couples.
